

Get CONNECTED

Having accurate and reliable information at the point of care is critical to improving patient outcomes.

Information about a patient's demographics, medications, allergies, lab results and immunizations can impact your diagnosis. Having access to your patients' longitudinal record can increase your efficiency and make it easier to accurately assess the situation.

KONZA will allow you to easily share a patient's medical information electronically with a network of healthcare providers from all disciplines while meeting HIPAA and HITECH regulations for confidentiality.

KONZA provides you with the tools necessary to share your patient data, submit to the appropriate registries, engage your patients via a patient record and wellness portal, and evaluate population health in your community. The KONZA website has been created as a resource for you and your staff. There you will find training documents and videos, health information exchange updates and news briefs. Our Secure Clinical Messaging/ DIRECT allows you to instantly share data with other providers and EMR/EHR services while meeting the requirements for Medicare/Medicaid incentive payments.

"Isolating this kind of health information, using the right technology at the right time is a hugely powerful tool."

Joe Davison, MD
West Wichita Family Physicians, P.A., Wichita, KS

Why Kansas Health Information Network?

KONZA is the physician-led health information exchange.

SECURE EXCHANGE OF PHI

Digital transfer of personal health information is secure.

MORE COMPLETE PATIENT RECORD

Helps improve patient encounters and health outcomes while avoiding duplication of labs and tests.

ANALYTICS

Provides participants access to secure analytic dashboard and report services to support improved outcomes, quality reporting, and reimbursements.

DIRECT MESSAGING

Secure messaging between physicians and between physicians and their patients.

TIMELY & EFFICIENT

Efficiencies of scale – information goes into the HIE once and is universally available to participating members of the healthcare team.

PATIENT ENGAGEMENT

Meets the requirement to provide patients an ONC-certified patient portal that offers 24/7 access to their longitudinal health record.
